

Water resistant additive

RT-3163

Features and advantages:

The main function of RT-3163 is to improve the film resistance to hot water immersion or heat resistance, and to improve yellowing resistance and adhesion after participating in the film formation.

Product specifications:

appearance	Orange yellow transparent liquid
Valid copy of	60±1%

Application: solvent - based/self - drying/baking/two component acrylic - polyester coatings

Recommended dosage: 1-3% for whole dosage

Usage: Mix evenly into finished paint

Packing: 25kg/ drum

Matters needing attention:

1.) Dumping method is recommended, not extraction method, in order to avoid external secondary pollution

2.) After use, please seal the lid of the barrel and clean the dirty part to prevent moisture/gas/water/fire. D security

3.) Please test the sample immediately upon receipt, discard and replace the sample after 2 weeks beyond the mark on the bottle
