

Dibutyl nylon acid

Product features:

This product is a plasticizer for polyvinyl chloride polyethylene copolymer, cellulose resin and synthetic rubber. Low viscosity, low softness and soft, commonly used as a substitute for DOA, can give products good stain resistance and resilience. Mainly used with DOP and other cold resistant low temperature agricultural film, industrial packaging film, leather products, etc. The product also has good gelation performance and can be used in acetone nitrocellulose coatings.

index	specification
appearance	Colorless transparent liquid
Content %	99.0 min
Moisture %	0.15 max
Acid value mgKOH/g	0.2 max
Color number PHA	20 max

Packing: ● 200kg iron drum/plastic drum ● IBC drum ● Container container ● Liquid bag
