

## Diisobutyl nylon acid (DBE-IB)

### Product features:

This product is a colorless and clear liquid with slight odor. It is an environmentally friendly and highly efficient film forming agent with low toxicity (no phthalic substances), small odor, biodegradable and low vapor pressure.

### Quality standard:

index	specification
appearance	Colorless transparent liquid
Content %	99.0 min
Moisture %	0.15 max
Acid value mgKOH/g	0.2 max
Color number APHA	20 max

### Performance and use:

- ① Can be dissolved in most organic solvents, insoluble in water.
- ② is widely used in water-based architectural coatings, a special ester film-forming aid, not only has the advantages of traditional alcohol ester film-forming AIDS simple storage and transportation, convenient use, but also has obvious improvements in film forming efficiency, low toxicity, no irritating odor, water insolubility and other aspects, film forming efficiency is significantly higher than alcohol ester 12.
- ③ It is also widely used in solvent coatings, PE elastomers, adhesives, cleaning solvents, humidifying resins, soil stabilizers, oilfield chemicals, pesticide carrier solvents and other fields.

**Packing:** ● 200kg iron drum/plastic drum ● IBC drum ● Container container ● Liquid bag
