

Environmentally friendly drier

RT-3129

Features and advantages:

This product is a new environmental protection drier, does not contain tin and other harmful detection substances, especially suitable for the European Union and other requirements of wuxi components testing standards, is the production of high-end products or export products instead of organic tin excellent choice, especially suitable for elastic paint PU system to replace the common drying agent T-12.

- 1、 the new safety and environmental protection drier, can replace lead mercury and commonly used organic tin drier.
- 2、 reduce the selectivity of the reaction with water, in PU dispersion, reduce the side reaction of water and NCO groups.
- 3、 Promote the reaction between NCO and OH, and improve the reaction efficiency of NCO

Product specifications:

appearance	Amber and brown liquid
Active ingredient	20% (without diluent)
Specific gravity (25°C)	1.15-1.23
ingredient	Organic Secret

Application: polyurethane system

Tianjin Ruike Chemical Co. LTD
Add: Room 116-11, 160 Xiangyuan Road, Jingjin Science and Technology Valley Industrial Park, Wuqing District, Tianjin
