

## Dispersant

### RD-9231

#### Features and advantages:

1. Polymer dispersant suitable for solvent based industrial coatings and automotive coatings.
2. It can be applied to non-resin color paste, improve the exhibition of organic pigment, effectively reduce the viscosity of high concentration color paste during grinding.
3. It has wide compatibility with various resin systems and is suitable for the dispersion of carbon black.

#### Product specifications:

|                       |                                 |
|-----------------------|---------------------------------|
| appearance            | Light yellow transparent liquid |
| Effective ingredients | 50%                             |
| composition           | Acrylic block copolymer         |

**Application scope:** PU coatings, NC coatings, industrial coatings, automotive coatings

#### Recommended dosage:

|                    |          |
|--------------------|----------|
| Inorganic pigments | 1-20%    |
| Organic pigments   | 20-30%   |
| Carbon black       | 30-80%   |
| Full amount        | 0.1-0.5% |

#### Usage:

Resin and solvent should be pre-mixed, and then under the stirring will be slowly added until the solution is uniform,

pigment in the additives after adding.

**Packing:** 25KG non-recycled blue plastic drum. The product is not completely used, need to tighten the lid after use.

**Storage:** keep away from fire and light source and keep away from light
