

High fluoride zapine

RF-7600

Features and advantages:

1, RF-7600 fluorocarbon modified leveling agent, can greatly improve the fluorine carbon content, and more strongly reduce the surface tension of all kinds of organic coating system, fast substrate wetting speed, more efficient, lower dosage.

2, eliminate surface defects, no adverse effect on the overall performance of the paint film, and has good compatibility, has outstanding anti-shrinkage effect, flow effect is very good.

Product specifications:

appearance	Colorless transparent liquid
composition	Fluorocarbon polymers
Valid copy of	70%

Application: furniture paint, automotive paint, baking enamel, iron printing paint, two-component epoxy system

Recommended dosage: total formula amount 0.1-0.5% (please test the most appropriate dosage before use)

Usage: can be added at any time in the production process, please stir evenly, please test before use.

Packing: 25KG non-recycled blue plastic drum. The product is not completely used, the lid must be tightly closed after use.

Storage: keep away from heat and fire and keep away from light.
