

Glass paint bonding agent

RT-3115

Features and advantages:

1. Improve the adhesion of air-dry coating film to difficult to adhere to the substrate.
2. The improvement of adhesion is very obvious, and its water resistance, corrosion resistance and salt resistance are good.
3. More suitable for subsequent agent, elastomer, sealant, ink, etc., to improve the excellent adhesion for a long time.

Product specifications:

appearance	Colorless to yellowish clear liquid
The density of	0.941
PH	7
composition	Silane coupling

Application: glass, PVC, wooden table surface treatment.

Dosage and usage:

Solid component of resin 1-2%;

The epoxy coating must be added in the curing agent;

The others are first mixed with resin,
